INTRODUCTION

Welcome to the latest edition of the BST Newsletter which as you will see has reverted back to being weekly; this should mean that it is easier to follow your favourite reviews.

We have one Final Review this week for Smart Soccer Trading.

We'd like to hear from you, please contact me by e-mail via the Bloggers Corner at news@bettingsystemtruths.com

U Cant Lose Has Been Awarded: ★★★★★

Until September last year I resisted the magnetic pull, I seem to get from Arbing services. It is a known fact that the most successful punters are those who source out quality information and trade the exchanges/bookies.

U Can't Lose contacted me back in September 2012 and since then I have been closely watching their service with interest. Due to the nature of this type of service, I could not give this review to our team so decided it was something I would look at myself.

Before I tell you about my review, please check out the special offer I have managed to arrange for you to try this service out. This is not a tracking link and I will not receive any compensation if you take the trial with them today.

<http://www.ucantlose.com/174-5.html>

I based my review on a £200 starting bank. I will base U Can't Lose's published results to an equivalent £200 starting bank also. I would just like to point out at this point that if you are arbing at £200 per arb it is advisable to have access to at least 3 times the amount of money you are using per arb as funds can get tied up in other arbs. And floating from bank account to bookmaker accounts. This is normal. The more money you have available to backup your floating money the better. That amount is never at risk but the capital is essential. The review lasted 5 months, from September 2012 Until January 2013. I will be looking at this review in the respect of Return on Investment, as each individual arb is an investment. You need to be organised in this approach but if you can show just an ounce of common sense and organisation, this can work very well for you. With arbing the risk can be high but every bet you place on a betting exchange carries a lot of risk. Therefore, I would ask that you open your mind up to the possibilities especially with trading strategies. The fact that the outcome of a trade depends on your skills and not the skills of an animal or football team totally puts me at ease. Whether you profit or not from this type of bet has absolutely nothing to do with the results of the race or the result of the football match. It is all to do with you and you are in total control at all times.

September 2012

Me - £545.36

U Can't Lose - £619.42

At this point, you could bank the money made and start the following month using the

£200 bank once again. This is what I decided to do for the purpose of the review. Just be aware that compounding your bank each month can increase your earnings tenfold.

October 2012

Me - £589.46

U Can't Lose - £671.72

November 2012

Me - £534.67

U Can't Lose - £479.32

December 2012

Me - £397.97

U Can't Lose - £383.52

January 2013

Me - £467.68

U Can't Lose - £541.96

This is the five month summary for both my own personal records and for U Cant Lose's website.

Personally, I invested £1000 in a 5-month period. In that 5-month period, I banked £2535.14. (This is a 253.5% ROI) Whilst comfortably keeping my £200 investment in tact ready for the start of each month.

I could have easily doubled my investment after month 1 to £400. This would mean banking £345 in September and starting October with a £400 start bank instead of the £200 bank I started with in September. This would have doubled the profits shown above in October.

Had I then took another £200 from October's profits of £589, that would leave me to bank £389 and start November with a £600 start bank I could have tripled the profits for November.

Personally I would stay at that sort of investment level however, you can see compounding your earnings with U Can't Lose is a very powerful way to climb the investment and return ladder. If you were just starting out in this business, I would probably bank the profits for the first few months to impress the wife :). Then start compounding month to month.

This product is going to get a very high ranking from me personally. The person controlling it only restricts the success of arbing. This product is not for everyone but if you can open your mind, stay organised and take this seriously, This product is for you! There were no problems encountered during the review whatsoever. All e-mails sent throughout my review arrived promptly giving me enough time to place the arbs successfully. I have read many articles about arbing companies sending arbs far to late.

This is not the case with U Can't Lose in my experience. Sometimes the prices changed to worsen the trade and other times the arb profit potential increased. It did really swing in roundabouts. This is the difference in monthly profit levels that you can see above between my personal results and those of U Can't Lose.

Rating the service

- Profitability: 4.5 (★★★★★)
- Ease of use: 3.5 (★★★★)
- Risk: 3.5 (★★★★)
- Return on investment (ROI): 4.5 (★★★★★)
- Support and documentation: 5 (★★★★★)
- Time needed to apply the system: 3.5 (★★★★)

U Cant Lose Has Been Awarded: ★★★★★

At the start of February 2012, U Cant Lose Ltd ran the following incredible special offer exclusively for their list members...

...Pay £30 for 12 weeks unlimited access to the brilliant Odds Trawler Pro software and get 12 weeks of U Can't Lose Arb Alerts (Email) - worth £81 - on the house!

The doors to this offer closed on 10th February...much to the disappointment of many who did not act fast enough (the offer was only open for 48 hours) to claim their place.

Well. I'm delighted to report that, after much cajolement, U Can't Lose Ltd have decided to reopen the doors to this offer for a limited time and to a select handful of trusted partners only.

I am even more delighted, and a little bit flattered, that we here at BST are one of those trusted partners.

The deal on offer is by far the best value deal I have seen this year. and I urge you to look at the link below as soon as you can.

<http://www.ucantlose.com/174-5.html>

Registration for this offer will close at midnight on Sunday (24th February) so act fast to avoid missing out.

This offer works out at less than 18p per service, per day which, however you look at it, is just staggering value for money.

In fact, I suggest you **register here right now** before they come to their senses and increase the price! :)

Smart Soccer Trading - Final Review

14th February 2013

Sergeant Lucian - Final Review of Smart Soccer Trading

Rating:  4.0 STARS

Hi Bloggers,

Here's the final summary for BST *Smart Soccer Trading* review. *Smart Soccer Trading* is from Steve Davidson stable. Michael has put together a lot of unique trading soccer strategies into three sections: Introduction, Gold and Premier. **The price for full package is 99.99 pounds** and I consider this as a reasonable price for a full trading course.

Not an easy review here as the product contains a lot of strategies and the success of these strategies is based on finding good matching selections, expectation of bookies for that matches and personal analysis. Perfect trading does not normally involve the full soccer match, in most cases before the finish the trade has been completed and a profit secured or stop loss strategy has kicked in to make the losses as low as possible. Without stop loss strategy or a cover bets strategy huge losses can hit the trading bank.

Before you start to use these strategies any user must understand that following the intro package is essential. Also a period of paper trading is needed or trading with low stakes. The reason is not only for correct knowledge of the strategy and how to handle it, the main reason is the selection process and making all the pre match documentation.

Now after using 8 strategies from all three packages here are the results:

Start Balance: 1000 points

Running Balance: 2421.52 points

Profit: 1421.52 points

For all the package I consider a **4 star rating** is fair one, the strategies bring clear profit if you trade in the right games. Personally I recommend good documentation on general trading before using this package and see simple trading strategies as lay/back or back/lay on different markets as Draw, Under/Over 2.5, etc. Also on internet anyone can read about simple rules for documenting a soccer game. This is the reason for some comments as this is a trading strategies collection and not a system with selections process for soccer games.

BST Newsletter © BettingSystemTruths 2013

In my opinion here order of the strategies for you to read and apply:

1. First Goal 0-10 Minutes
2. Any Unquoted Correct Score Strategy
3. Any Unquoted Correct Score Strategy with safeguard
4. Halftime 0-0 and Fulltime 0-0
5. Halftime 0-0 and Fulltime 0-0 (with a stop loss)
6. Lay the Draw & Correct Score Trading Strategy
7. Lay The Draw & Cover All Draws
8. Both Teams to Score & Correct Score
9. Under 2.5, and Correct Score markets
10. Under 2.5 goal and first Goal Market
11. Halftime Score Market, with under 2.5 if scoreline is 0-0
12. Halftime Score Market, with under 2.5 if scoreline is 0-1 (with goal)
13. Underdog leading at halftime
14. Buying High & Selling Low

Final words - the product as a trading package worth is **4.0 STARS**.

Thank you for your time and I hope you enjoy the review.

League Table of Reviews

[Return](#) 

A reasonable way of comparing the performance of systems is to work out the profit (or loss) as a percentage of the starting bank. Obviously this table doesn't replace reading the reviews, because *profit as %age of bank* is not the only factor in judging a system. Nevertheless, it is a valid at-a-glance way of bringing the mass of data together.

The league table now includes systems that have finished their reviews as well.

We have thirty three reviews that have made a profit of over 15%. And we have a new number one but will it stay there we shall have to see.

Reviewed System	Bank Start	Total /Loss Profit	Profit as Bank %age of	Position Week Last	Position Week This
