INTRODUCTION

Hi Folks,

We have no New Reviews, but we have two Final Reviews this week. Soccer Magic passed, but Sports Bet Gold failed the reviews.

On this week's league table The Betting Profits Soccer System has shot to #1. As the person who put the rules together from the rather vague advice in the manual, I do advise caution. It's only been going a couple of weeks and will probably be an up and down system. Similarly with Betfair Success Formula, it is doing well at #2, but one bad result and the profit can be severely dented as we found four weeks ago (see its profitability graph)

On the front runners graph of the profit being made as a percentage of their starting bank, Flat Ratings Pro still looks promising. Soccertips Software is doing well, so far.

Profit expressed as a percentage of start bank is not everything. Please read the full reviews of anything that interests you!

Soccer Magic - Final Review

Sgt Tommy Reviews Soccer Magic

Passed And Approved

Rating: 

Hi Bloggers,

This has been quite the 'roller coaster' ride with the 'Soccer Magic' man with some good results at the start then a bit of a lull around half way, followed by a run of very good results, immediately followed by some very bad results, and finally ending with a positive result on day 84!

Amazingly enough during the 84 day review of Soccer Magic, the starting bank has never reached a negative point, its lowest point being **+100.63 pts** after day 4. Just to illustrate the 'swings and roundabouts' even further, after day 38 we were at **+ 104 pts**, reaching a peak of **+ 198.97 pts** at day 73.

Now the important point to bear in mind here is that we ended the review of Soccer Magic on day 84 at **+ 142.91 pts**, that is a **loss** of ** 56.06 pts** in just 11 days! Now it could well be that Soccer Magic could go on to attain the 'dizzy heights' of day 73 again then be followed by several losing days. That is definitely the nature of this particular beast and if you like to have lots of bets every day and can stand the very dramatic twists and turns associated with lots of bets, then Soccer Magic may well be for you. Now onto the stats for the review period:

416 Bets/117 Wins = 28.12 % Strike Rate

Total Stakes for the review period = 786 points

Total Profit for the Review Period = 42.91 points

Return on Investment = 5.46%

So as mentioned previously you do get a lot of bets these are a mixture of singles and multiples even had a 12 fold bet during the review. Now Soccer Magic does use advised stakes ranging from 1 to 4 points now we can see that using this you would have had to stake 786 points to win 42.91 points which is only a 5.46% ROI. You have of course to take into account your monthly fees which at the moment are 39 GBP a month or 78 GBP for the quarter and of course adjust your staking accordingly. To put

this into perspective if paying the monthly subscription and you staked 10 pounds per point you would have made around 312.10 pounds profit after deductions, your Total Stakes would have been 7860 pounds over the 12 weeks this would have further reduced your ROI to 3.98% or with the quarterly fee a little better a 351.1 pounds profit and a 4.47% ROI. Of course you would have a few days left still as the review period covered only 12 weeks and not a complete 3 months but this is just to give you an idea.

At the end of the day Soccer Magic DID make a profit over the 12 weeks so I would give this a pass mark of 2.5 stars considering some of the risks involved and the outlay required to make the profits.

I would definitely advise caution against weighing in too heavily with your 'hard earned dosherooni' until such times as you are comfortable with the 'mood swings'!

Sports Bet Gold (previously Insider Gold) - Final Review

Sgt Tommy Reviews Sports Bet Gold

Failed – (but not all is lost completely)

Hi Bloggers,

So after so much promise shown during the trial of *Sports Bet Gold* and heading the 'league table' for several weeks, we come to the end of the 84 day review of Sports Bet Gold not quite losing our bank, but having seen one almighty collapse not dissimilar to 'Fanny and Freddy' !!

Now the interesting point to bear in mind is that the downfall of Sports Bet Gold was caused for one specific reason— the horse racing selections.

Let me give you a rough idea from the figures over the last 84 days.

I have spotlighted the 3 main sporting selections being horse racing, golf and football. There were other mixed dbls and the odd darts bet but these only made up a fraction of the selections.

Horse racing P/L = **- 106.06 pts**

Golf P/L = **+ 39.85 pts**

Football P/L = **+ 46.57 pts**

Betting System Truths Weekly Newsletter © Enigma Media 2011

So bloggers, take away the horse racing figures and your looking at a very nice profit of **+ 86.42 pts** over the 84 day period which would obviously have been a pass for Sports Bet Gold with flying colours!

Unfortunately of course I was reviewing the total package where the majority of the selections came from horse racing.

Another definite negative for me was the amount of times I asked for explanations as to 'bloody awful' results for the 'GG'S' and had no response until around day 80 or so with the old chestnut..'worst results in 15 years'...bla bla bla...) Sorry mate, too little too late.

Customer service -zilch!

Positive note- Just look at those golf and footie figures!

So go home, take stock of the situation and come back with a new service concentrating on these 2 sports ONLY, brush up on your customer service skills, and then maybe we can begin to talk in more constructive tones about your product.

Alas for the moment, I have no choice but to 'fail and jail' Sports Bet Gold as it stands but with definite hope for any future re-inventions you may care to create.

All the best,

Sgt Tommy

League Table of Current Reviews

The systems under review have different starting banks, different stakes and some systems have variable stakes. A reasonable way of comparing the performance of systems is to work out the profit (or loss) as a percentage of the starting bank and to average this out over the number of the days of the review.

Obviously this table doesn't replace reading the reviews, because *profit %age of bank per day* is not the only factor in judging a system. Nevertheless, I think it gives a valid comparison and an at-a-glance way of bringing the mass of data together.

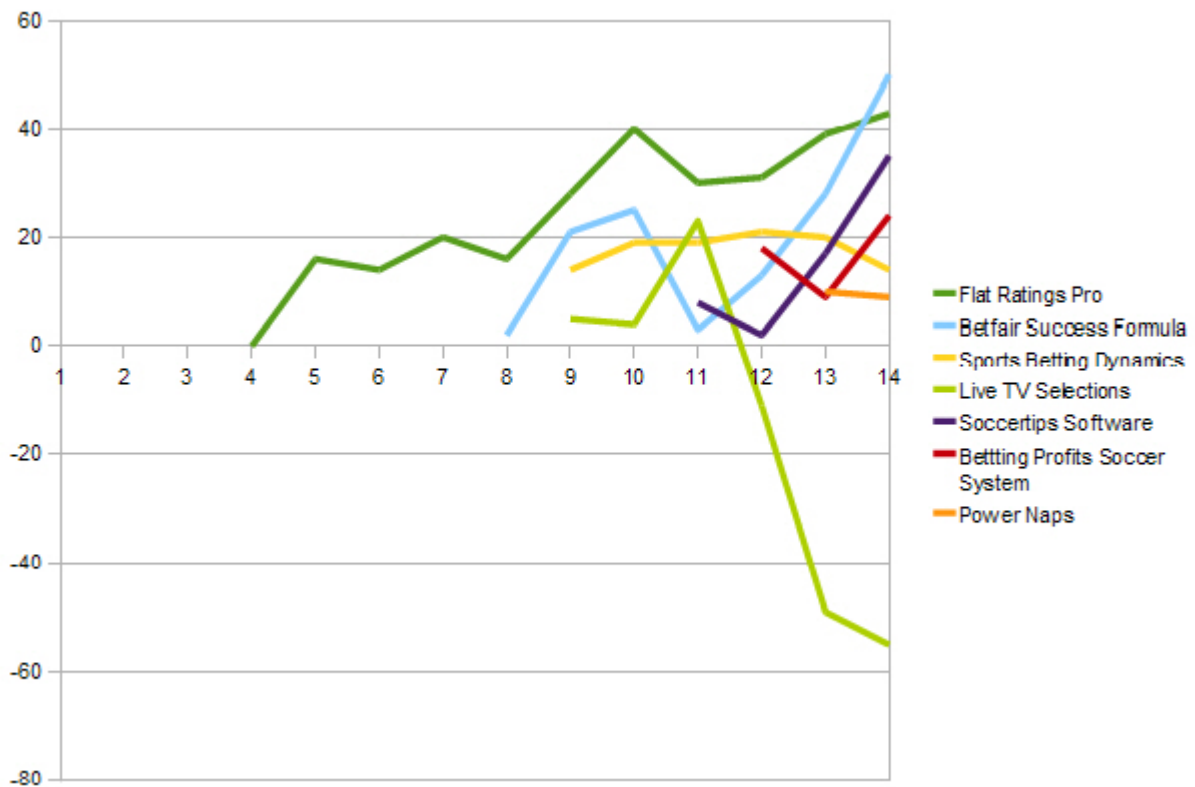

| System Reviewed | Start Bank | Profit /Loss | Profit as %age of Bank | Days Reviewed | %age per Day | Position Last Week | Position This Week |
|-------------------------------------|-------------------|---------------------|-------------------------------|----------------------|---------------------|---------------------------|---------------------------|

Profitability Graph

I'm including a graph of the profit being made by the front runners as a percentage of their starting bank. This gives a week by week comparative view of their progress since we started this form of the league table in newsletter #30.

It gives a representation of the volatility or dependability of each system. I've taken off the reviews that have finished. Ideally we would want a graph that increased each week by roughly the same amount. If a system or tipping service could produce that, then we would really have a winning review! Once again, Flat Ratings Pro is still producing a steady profit. Betfair Success Formula has recovered well from its big loss of a few weeks ago. Live TV Selections will be taken off the graph next week as it has gone out of the bottom.

Profit as a %age of starting bank

Are you a member of the 1%ers yet?

[A few newsletters ago](#) I introduced the idea of making 1% profit on your betting bank per day.

How is your betting going? Do you average 1% or more profit per day?

In newsletter #39, I said about my profitable bets, "What I have to do now, is assign a strictly ring-fenced bank to them that is never used for anything else and work at achieving that 1% each day, on average.

I'm going to assign a smaller, fun money, bank, separate from that, for any testing and speculation of things that might work. If that bank loses, so be it, but meanwhile I hope to watch that ring-fenced bank grow for a 12 or 14 months!"

Well, I have done that since 13th Feb. I've been disciplining myself for one month. It has been interesting. My ring-fenced bank has done great. My speculative bank has bombed out, losing 143 points. My ring-fenced bank has made 603 points profit.

I think this shows the value of separating out your speculative bets from your proven profit-making bets.

Before I separated out the two types of bets I was averaging 0.43% profit per day over a three week period that I had kept stats for. After separating the bets and excluding the speculative bets from the calculation, that same average has increased to 1.25% per day and has averaged 3.04% per day for this last month.

Are you a 1%er?

If you become one (and discipline yourself for a year or more), you will be a successful pro-punter. As per the [earlier article](#) you will be making a living salary from betting.

Next Week & Signing Off

This is Sgt Rich signing off and I hope that you have found some of the content within this newsletter to be useful. Remember to look out for the next BST newsletter in your e-mails on March 23rd. Until then, here's to successful punting.
