INTRODUCTION

Hi Folks,

This week we have just one New Review and no Final Reviews.

“The Betplan” profits were being miscalculated. Our reviewer, Adrian has adjusted them now. They are still showing a fantastic 58% to 75% profit in only 25 days.

The reviews for Betfair Success Formula and Betting Profits Soccer are continuing again now that the football season is up and running.

We’d like to hear from you, please contact me by e-mail via the Bloggers Corner at rich@bettingssystemtruths.com

Beaten Females Introduction

Inspector John Introduces Beaten Females

Hi Bloggers

Inspector John here to introduce the new system, Beaten Females, created by Sam McCallion, whose research of the system goes back to 2003.

As the title suggests, the system covers laying female horses and is supported by a comprehensive pdf e-book and a selection service, delivered daily into your inbox. The cost is £57, which covers the manual and a years' free selections, but you should be able to grasp the methodology after reading the manual.

The aim is to take advantage of the statistical fact that mares and fillies time and again under perform in comparison to their male counterparts. The 19-page manual is comprehensive, easy to read and screen shots make it easy to grasp exactly how to make selections. The Beaten Females System is a low to medium liability laying system that has been developed for Irish Racing and bets can be placed prior to the off or the night before racing. Due to the fact that the Beaten Females system focuses solely on Irish Racing you will normally only have to trawl through one meeting per day to find your potential selections. This should take no more than 5-10 minutes per day. Lays can be placed if you are available to be at your computer for a qualifying race or by using a betting bot, possibly overnight.

The initial review will last for 56 "betting days", with the option to extend to 84 "betting" days. If it turns out we only have bets on one or two days a week, we will go straight to a 12 "betting" weeks review, in this case it would NOT be betting days.

The author recommends two staking [systems](#): Level Stakes and a 5% Rolling Bank. I will operate both for the purposes of this review with a 500-point opening bank for each. Level Stakes will use a 1% stake throughout and the Rolling Bank 5%. The latter takes 5% of the starting bank as stake then calculates 5% of the bank after every bet to establish the stake for the following bet.

I shall start the review right away and post the results straight after this introduction is published. Updates will be posted daily, but due to the selections coming from the Irish racing, there may not be so many to publish so I will see how it goes in relation to the "betting days" ruling.

Sam seems a very genuine character who has spent many months developing this system until he now feels it is worthy of marketing. He has answered all my queries in short time and offers lifetime support. He also offers a 30-day money back guarantee for whatever reason you believe the system is not for you.

The results on his website are pretty impressive and I hope this continues during this review and beyond.

League Table of Current Reviews

[Return to Contents/Index of this newsletter](#)

A reasonable way of comparing the performance of systems is to work out the profit (or loss) as a percentage of the starting bank. Obviously this table doesn't replace reading the reviews, because *profit as %age of bank* is not the only factor in judging a system. Nevertheless, it is a valid at-a-glance way of bringing the mass of data together.

I've colour coded the reviews that are the currently most successful, with the colour of their profitability graph to make them easier to spot.

The Betplan profits were being miscalculated. They have been readjusted now.

There are quite a few profitable reviews at the moment. I'm running out of colours!

Profitability Graph

Here is a graph of the profit being made by the front-runners as a percentage of their starting bank. This gives a week by week comparative view of their progress.

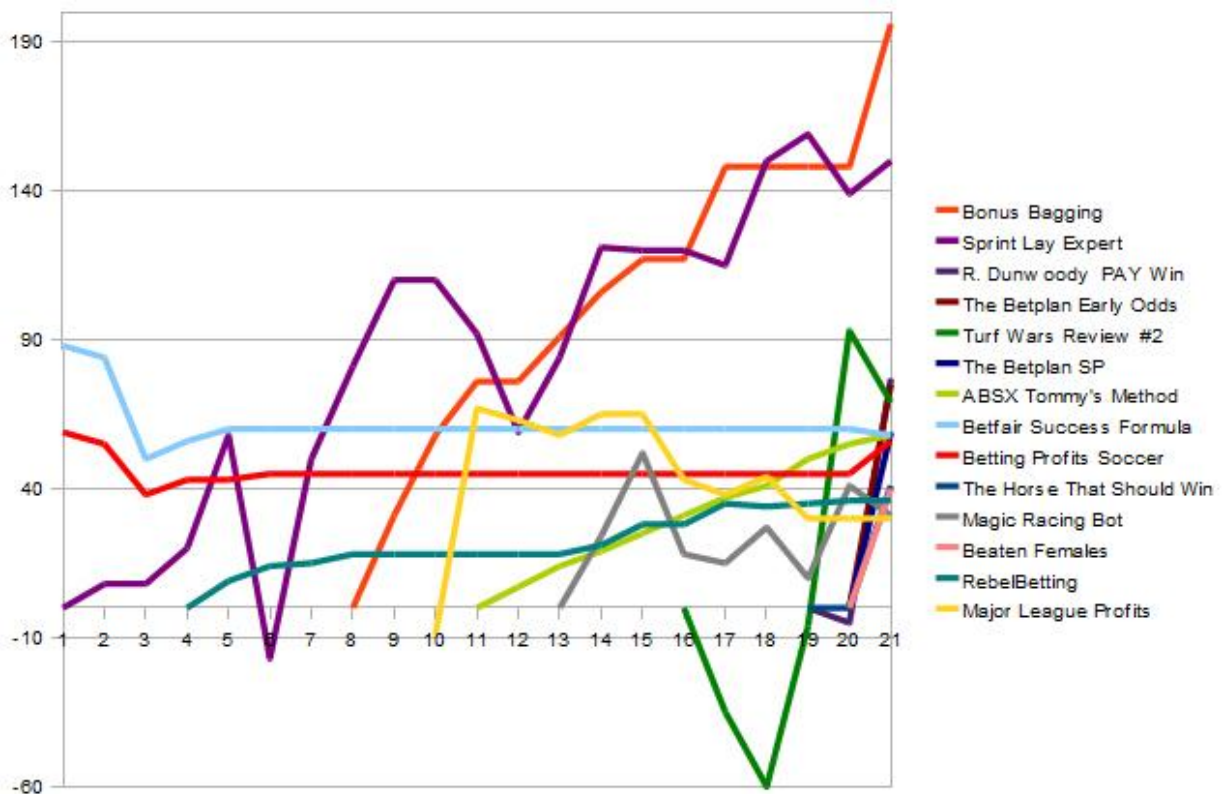

It gives a representation of the volatility or dependability of each system. Ideally we would want a graph that increased each week by roughly the same amount. If a system or tipping service could produce that, then we would really have a winning review!

The Betplan figures have been re-adjusted this week.

The graph is starting to look like a map of the London Underground! LOL!

The reviews for Betfair Success Formula and Betting Profits Soccer are continuing now that the football season is up and running.

Profit as a %age of starting bank
