League Table of Current Reviews

[Return](#)

A reasonable way of comparing the performance of systems is to work out the profit (or loss) as a percentage of the starting bank. Obviously this table doesn't replace reading the reviews, because *profit as %age of bank* is not the only factor in judging a system. Nevertheless, it is a valid at-a-glance way of bringing the mass of data together.

I've colour coded the reviews that are the currently most successful, with the colour of their profitability graph (next newsletter section) to make them easier to spot.

A quiet week, Magic Backing Bot continues to do well.

System Reviewed	Start Bank	Total Profit /Loss	Profit as %age of Bank	Position Last Week	Position This Week

Profitability Graph

[Return to Contents/Index](#)

Here is a graph of the profit being made by the front-runners as a percentage of their starting bank. This gives a week by week comparative view of their progress.

It gives a representation of the volatility or dependability of each system. Ideally we would want a graph that increased each week by roughly the same amount. If a system or tipping service could produce that, then we would really have a winning review!

This week, Magic Backing Bot has made more profit – a great performance over the past few weeks.

A blogger, Ian, asks:

Has anyone got All by the book and Golden Key 2 ??

Which one would you recommend to buy for consistent profits and not getting limited by the bookies.

Can any readers help to advise Ian?
