INTRODUCTION

Hi Folks,

As you may know, we have had a problem with a virus attack on our LayTheOdds website. While we are working behind the scenes to restore full functionality, we can only apologise for the downtime. This has affected our newsletter this week and I am only able to report the figures from our BettingSystemTruths website.

This week we have two New Reviews and no Final Reviews.

Among our Current Reviews, this week, we have a remarkable total of nine reviews making a decent profit of over 40%, we'll have to see if they can be maintained throughout the reviews.

Several front runners dipped this week but *Place Bet Pro* continues to increase. It's too early to say how *Form Labs* and *Betting Bubbles* are going to do during the reviews. *Greyhound Lay Pro* is proving to be very consistent. It will be interesting to see how *BettingFlow* does once the LTO website is back up and running.

We'd like to hear from you, please contact me by e-mail via the Bloggers Corner at rich@bettingssystemtruths.com

Betting Bubbles – Introduction

29/2/2012

Sgt Rob Reviews Betting Bubbles

Dear all,

Sgt Rob returning after a period of convalescence to review *Betting Bubbles*, a service provided by Stuart Landaw and hosted by Winning Information Network.

Betting Bubbles is a service that provides tips for backing selections in a variety of sports such as horse racing, greyhounds, football, tennis, rugby, golf and snooker. These bets could be win only, each way, doubles and trebles.

Bets are provided by email on a daily basis (although there is the function to logon to a website and access them).

Each bet recommends how many points to stake between 1 and 10 where 10 indicates a very strong bet.

The emphasis is on getting value so you are advised to have as many bookmaker accounts as possible to achieve this.

You can expect, on average, 1-2 tips a day.

The recommended staking plan is to use a 50 point bank and I will equate 1 point to £10 so starting bank will be £500. For comparison against other BST reviews, I will also do a level staking bank of 100 points.

The cost of this service is £55 (+VAT) per month or £110 (+VAT) per quarter and payment is processed via PayPal.

The review will initially last for 56 betting days and if it shows promise, I will continue on to the full 84 days.

So, time to get back in the saddle and see how this service fares!

Cheers for now,

Sgt Rob Reviewing Betting Bubbles

Auto Bet Wins Introduction [Return](#)

27/02/2012

Sgt Howard reviews Auto Bet Wins

Hi Bloggers,

My name is Howard and I'm 38 years old, live in the North West and have 20+ years betting experience. I have always taken a keen interest in Betting particularly Horse Racing. I only recently turned Professional this year. I have plenty of experience in both Backing, Laying and Trading.

Anyway on to the Introduction for *Auto Bet Wins*.

The system

So what do you get for your money? The system is explained on a 26 page PDF. [Auto Bet Wins](#) is a betting system created by Toby Maguire. As in the words of the author "the idea is that you will learn the formula so that you will never look to which horse is favourite for a race again, as you will always have your own favourite". You apply the system by manually applying ratings to Horses based on the Auto Bet Wins formula.

All the information on how to do this appears straight forward. Whilst I think a Novice bettor would take a little longer doing this (due to obtaining information from Race Cards) at first I see no reason why anyone would have any trouble following the system, and anyone will naturally get quicker in time.

Cost

It can be purchased by Click Bank for £27.00 (and £5.40 Vat). There is a 60 day money back guarantee offered according to the vender.

System requirements

To operate the system you'll need access to Racing Post Race Cards. You do not need to be paying a subscription to the Racing Post for the information you will need. There are no restrictions as to when you apply the system so you could bet just week days or weekends etc. You could apply this system just using Bookmaker accounts or using just exchanges or both.

As this system requires you to apply ratings to each horse by working through the race cards, it will obviously take a fair bit of operating time. I will give you an indication how long this takes on average as I get further into the review (as I fully expect it will get quicker as you get used to it). Because of this operating time it would be impossible for me to apply these ratings to all races so I will need to cut the numbers down by applying some filters.

I propose to only apply the ratings to races which meet the following criteria :

1. Minimum number of declared runners of 4 and a Maximum of 12.
2. Race must be a Handicap or a Claimer (both flat and jumps)
3. Race class must be between class 1 down to 5.
4. If all of the above are met I will apply the ratings to a maximum of four races a day.

Staking Plan and Betting Balance

I found it slightly alarming that there is no staking / betting bank advice included in the PDF. Therefore I have decided I will show results using **two seperate betting banks of 100 points each.**

Betting Bank 1

For Betting Bank 1 I will bet win only. The stake for each race will be a level stakes 5pts regardless of the number of selections. I say this because I expect there to be more than one obvious bet based on the ratings in some circumstances.

Betting Bank 2

Again I will use a level stakes 5pts but in this case I will bet each way only.

Obviously both betting bank results will be based on my interpretation of the ratings, therefore whilst avoiding giving the system away I will provide the ratings for the top few. By providing these and a brief view of my thoughts on each race it will hopefully give you a good indication if Auto Bet Wins will be potentially profitable for you, regardless if you agree with my choice of bets or not (e.g. You may choose to bet win only etc).

I have decided I will use both BOG and exchange prices (for Bank 1) and will clearly state which I have used to give you the best possible indication of potential profitability of Auto Bet Wins. I intend in the main to place bets in the morning between 9 and 11 am.

Review updates

I intend to do updates daily / or every two days during the review.

The initial review will last 56 Betting Days.

Regards

League Table of Current Reviews

[Return](#) 

A reasonable way of comparing the performance of systems is to work out the profit (or loss) as a percentage of the starting bank. Obviously this table doesn't replace reading the reviews, because *profit as %age of bank* is not the only factor in judging a system. Nevertheless, it is a valid at-a-glance way of bringing the mass of data together.

I've colour coded the reviews that are the currently most successful, with the colour of their profitability graph (next newsletter section) to make them easier to spot.

We have a remarkable total of nine reviews making a decent profit of over 40%, we'll have to see if they can be maintained throughout the reviews.

Profitability Graph

[Return to Contents/Index](#)

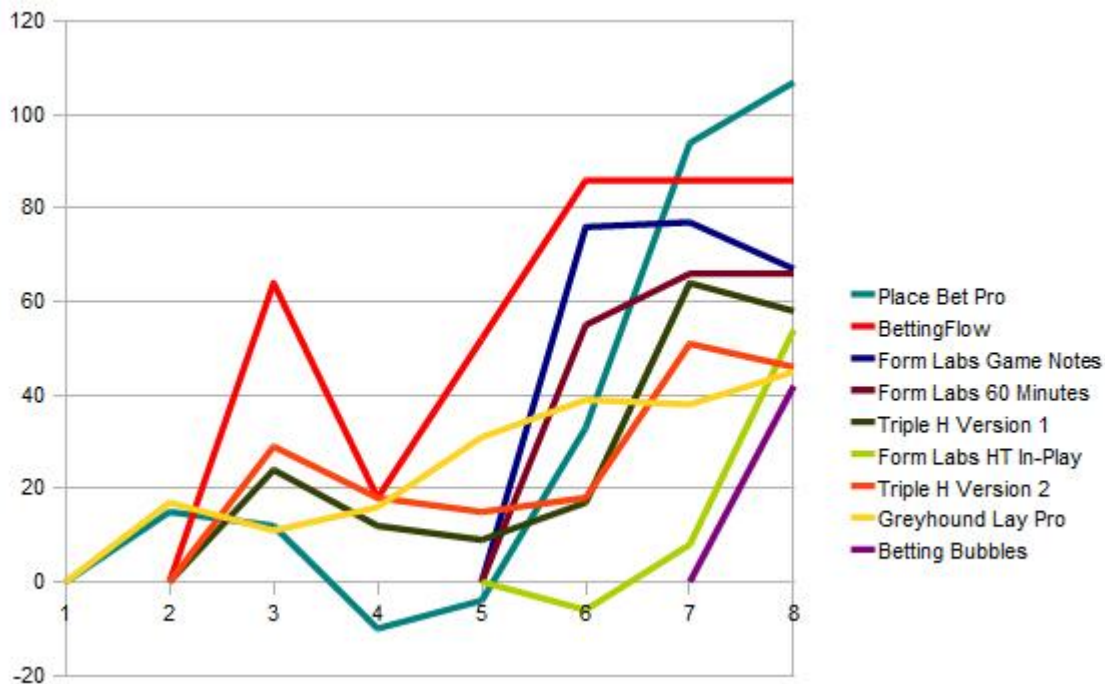

Here is a graph of the profit being made by the front-runners as a percentage of their starting bank. This gives a week by week comparative view of their progress.

It gives a representation of the volatility or dependability of each system. Ideally we would want a graph that increased each week by roughly the same amount. If a system or tipping service could produce that, then we would really have a winning review!

Several front runners dipped this week but *Place Bet Pro* continues to increase. It's too early to say how *Form Labs* and *Betting Bubbles* are going to do during the reviews. *Greyhound Lay Pro* is proving to be very consistent. It will be interesting to see how *BettingFlow* does once the LTO website is back up and running.
