INTRODUCTION

Hi Folks,

I'm afraid the process of moving the LayTheOdds website to the new server is taking longer than anticipated. While we are working behind the scenes to restore full functionality, we can only apologise for the downtime. This has affected our newsletter this week and I am only able to report the figures from our BettingSystemTruths website.

This week we have one New Reviews and no Final Reviews.

Among our Current Reviews, this week, Betting Bubbles has sunk after a great start. Let's hope it floats back up the chart again. Another previous high-flyer, Greyhound Lay Pro, has dipped this week. We still have seven systems making over 40% profit! Form Labs and Triple H have done well this week.

We'd like to hear from you, please contact me by e-mail via the Bloggers Corner at rich@bettingssystemtruths.com

Soccer Betting Oracle – Introduction

09th March 2012

Sergeant Lucian - Introduces Soccer Betting Oracle

Hi Bloggers,

Allow me to introduce to you the **Soccer Betting Oracle** tips service.

Soccer Betting Oracle tips services are provided by a professional soccer bet informants aimed at giving accurate and precise predictions.

The tips services cover Spanish, Italian and English and other soccer leagues. Subscription price is \$49.99/month. The subscription comes with Clickbank's usual 60-days refund policy and 7 day free trial.

The tips covers over/unders, handicap and straight win markets. Each day the services provide selections on email and members area.

The initial review of Soccer Betting Oracle will be for 56 "betting days", and may be extended to 84 "betting days", depending on its performance. If enough tips don't come through on a daily basis, then the review will automatically go for 12 weeks.

The initial bank will be 200 points and the emails will recommend how many points to stake on each tip. I will also report to level stakes for comparison using a 100 point start bank and 1 point stake per tip.

League Table of Current Reviews

[Return](#) 

A reasonable way of comparing the performance of systems is to work out the profit (or loss) as a percentage of the starting bank. Obviously this table doesn't replace reading the reviews, because *profit as %age of bank* is not the only factor in judging a system. Nevertheless, it is a valid at-a-glance way of bringing the mass of data together.

I've colour coded the reviews that are the currently most successful, with the colour of their profitability graph (next newsletter section).

Betting Bubbles has sunk after a great start. Let's hope it floats back up the chart again. Another previous high-flyer, Greyhound Lay Pro, has dipped this week. We still have seven systems making over 40% profit!

Profitability Graph

[Return to Contents/Index](#)

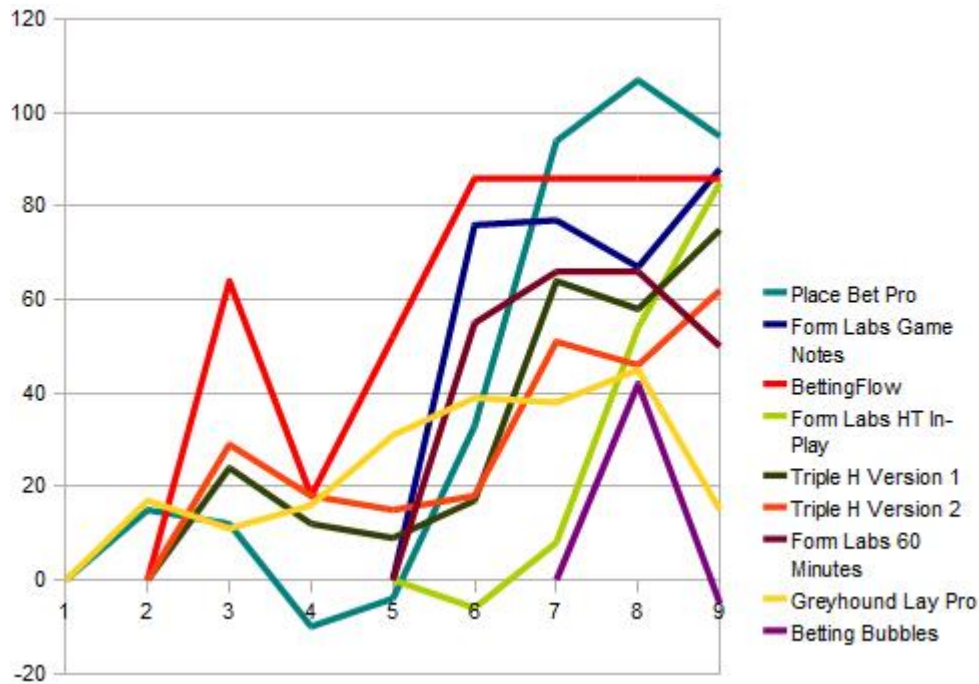

Here is a graph of the profit being made by the front-runners as a percentage of their starting bank. This gives a week by week comparative view of their progress.

It gives a representation of the volatility or dependability of each system. Ideally we would want a graph that increased each week by roughly the same amount. If a system or tipping service could produce that, then we would really have a winning review!

I've kept Betting Bubbles and Greyhound Lay Pro on the graph in the hope that they recover next week. Form Labs and Triple H have done well this week.
