## INTRODUCTION

Welcome to the latest edition of the BST Newsletter which as you will see has reverted back to being weekly; this should mean that it is easier to follow your favourite reviews.

We have two final reviews this week and that is Football Bets and Midas Method, we also a new review Race Ratings Pro this is being carried out by Sgt George we should have at least one new review next week hopefully more.

We'd like to hear from you, please contact me by e-mail via the Bloggers Corner at [news@bettingsystemtruths.com](mailto:news@bettingsystemtruths.com)

### Race Ratings Pro

#### Race Ratings Pro Introduction by Sgt George

Hi Folks

This is something a little bit different *Race Ratings Pro* is a video course by Michael Wilding on how to make your own race ratings. The course comes in 7 modules which are:

Module 1 - What are Ratings

Module 2 - Understanding What You Want From A Rating

Module 3 - The Best Way To Choose What To Rate

Module 4 - Measuring Your Ratings Performance

Module 5 - Designing Your Ratings

Module 6 -

Part 1 Lets Start Rating

Part 2 Normalizing Your Ratings

Part 3 Weighting Our Ratings

Part 4 Finalising Your Ratings

Part 5 The Statistics Of Your Ratings

Module 7 - Where To Go From Here

The modules total around 3 hours so thats a lot of videos to watch i would suggest doing some one day and the rest another. It is a good idea to have a pen and paper handy to make notes. You get a flow chart for Module 5 and a Ratings Worksheet (Excel) for use with Module 6 both are downloadable from the members area. So how much does it cost at the moment it is 49.99 UK pounds + VAT that is for the first 100 buyers thereafter it will rise to 99.98 pounds + VAT.

So how am i going to review this one now that is a tricky one, well the main theme from the author is for the user to create there own unique ratings using factors that they feel are important to them. The creator of the course does give a method so i will use this and compare it against my own idea. Now the creators methods has 3 columns Form Class, Speed Class and Earnings Class and the information is readily available in the online Racing Post (Free Version). For my own version i have added another column Consistency which is the same as the authors Form Class, now my own Form Class is actual form ratings, also i work out the earnings different.

I will apply the same information into both spreadsheets of course my one has one extra factor apart from this the author weighs the 3 different columns differently 1.00, 0.62 and 0.38 for mine this is set to 1.00 for each factor. This may sound confusing right now but these points are explained in the videos.

## BST Newsletter © BettingSystemTruths 2013

The thing to consider is the ratings will be evolving as you get used to doing the ratings one will probably be tweaking and experimenting with different settings.

### What Races ?

Well it would be difficult to rate every race so as explained in the videos you need to find a niche so that you only have a select few races per day. So without taking up too much space i am going to concentrate on the following:

Field Size 4 to 12

Class 5 and Above

1 mile to 3 miles distance

No Amateur, Apprentice, Conditional Jockey races

No Auction, Claiming, Selling races.

No NH flat , Hunter Chase races

Based on the above i will take the best 1 or 2 races at each meeting.

### What to do with Ratings?

Now the spreadsheet that you can download will actually show green in the Final Rating if the actual rating hits a certain percentage which means it should have a better chance of winning so for the Win Bets i will use the Top or Top 2 Rated providing they show green and have a rating of 20 points or more. You may have more than 2 selections if they are joint rated, although it does have a column with a ranking i prefer to look at the Final Rating.

Opposite to the green coding some horses will have a pinkish background in the Final Rating column this is horses who have hit a low percentage of winning so we going to look at these as Lay bets providing they have a rating of less than 10 points. Now some of the selections that fall in this category can have high odds which could be uncomfortable to alot of backers so i will only show bets under 10.00 at Betfair SP.

I will also give results to the so called exotic bets doubles, trebles and forecast etc when such opportunities arise for such bets.

### Recording The Results

All win bets and lays will be to Betfair SP minus 5% commission on winnings and forecast to Computer Straight Forecast returns. I will run 3 sets of 100 point banks for the creators approach and 3 for mine to cover Win Bets, Lay Bets and Exotic Bets. I actually have been using [Race Ratings Pro](#) personally for nearly 2 weeks so when this review became available that is why i volunteered for it as i have data from the 19th January. The results I will be posting shortly.

### Finally!

This is quite an ambitious review even then i can not cover all the different angles that could be put into the ratings, so all we can do is see how it fares. As i progress through the review i might see some patterns such as only horses rated a certain number and above, horses rated so much higher than their rivals, if i spot such developments i shall mention them in the Final Review.

## Football Bets Final Review Summary

### Sgt Chris reviewing Football Bets

28th January 2013

Hi bloggers,

Here's the final summary for our *Football Bets* review. Before heading to my conclusions let's take a brief reminder of the service. *Football Bets* is a tipping service and Phil Brown is the person responsible for the tips the customer will receive either through his e-mail account or just log in the members area, where past selections and results are also available.

Regardless if there are selections or not, the subscriber will be notified. Even more, for each bet the author provides with 3 to 4 bookies offering the best odds at the moment. As you can understand, in order to obtain the the best value it's essential to keep accounts with most online bookies. Betting with only 1 or 2 means that you won't grab the better odds every time.

Now, this is what was achieved during the 12 weeks of reviewing the *Football Bets* service. Firstly a glance on the strike rate of the selections:

Total number of bets : 94

Winning selections : 40

Losing selections : 51

Also 3 times the stake was returned.

**Win Strike Rate : 42,55%**

Three different staking plans were used :

1. Level stakes

2. Author's advised stakes

3. A rolling bank staking plan. Staking 2% of the bank at each bet, and recalculating at the end of the betting day. If it was a losing day, the stake remained the same for the next bet, but if it was a winning one, then the stake was recalculated according to the new bank. Every time the bank hit a new high, it was increased but did not decrease after a losing performance.

For each plan a 100 pts bank was used. Here's how they performed :

- Level stakes

**Start balance : 100 pts**

**Total P/L : -0.69 pts**

**Final balance : 99.31 pts**

**ROI : 0%**

- Advised stakes

## BST Newsletter © BettingSystemTruths 2013

**Start balance : 100 pts**

**Total P/L : -4.56 pts**

**Final balance : 95.44 pts**

**ROI :-4.86%**

**- Rolling staking plan**

**Start balance : 100 pts**

**Total P/L : -2.26 pts**

**Final balance : 97.74 pts**

**ROI : -1.1%**

**During the three month period of the review, the service would cost 104.97 £ (that's 34.99 per month).**

For new subscribers, the vendor provides a two week trial almost for free (paying only 1 £).

Of course, it's obvious from the results posted above, that no staking plan produced any profits. This simply means an empty pocket at the end of the review, losing any money paid for the service provided.

Also, I would like to point the disadvantage of having to be able to grab those odds suggested when the selections are sent each day. Don't forget, the final results of my review were based on the best odds available for each bet. If for any reason a customer can't have access at any time of the day, it would be difficult to spot those earlier better odds every time. It's a situation I believe should be underlined, because it has a serious effect on the final outcome.

No problems were encountered during the review whatsoever. All e-mails were promptly delivered, even when there was no selections.

Despite not making profit, but a small deficit, I can't put the "failed" tag on the Football Bets service, but a neutral opinion. Past results were promising and maybe it was not the best period for the service to show its potential.

Rating the service

**Profitability : 1**

**Ease of use : 4**

**Risk : 4**

**Return on investment (ROI) : 1**

**Support and documentation : 4**

**Time needed to apply the system : 4**

I hope it was an enjoyable review.

Regards, Chris.

## The Midas Method Final Review

27/01/2013

### Sgt Howard reviews The Midas Method

#### Final Review.

Firstly lets re-cap on the system.

The *Midas Method* is a betting system created by Steve Gilruth. The system is a Horse Racing backing system explained on a short to the point 11 page PDF. The system claims strike rates of 59% for the win and 87% for the place. There are two main systems (although if you purchase you'll receive some additional bonus systems) a during racing method and a before racing method. I tested the before racing method as the other demands you follow the live racing. I only tested the system on UK Horse Racing. The system itself is fairly straight forward to operate and isn't too time consuming. Without giving too much away it involves comparing some basic information on the Racing Post and Betfair. The author claims the before racing method takes approximately 15 mins but it took me up to an hour on busy days and on average 40 mins. I'm not sure how the author can possibly claim you can operate this in 15 mins.

#### Cost

The Midas Method previously could be purchased by Click Bank for £47.00 (and £9.40 Vat) but now this has changed from just the system to the vendor selling tips as well as the system.

#### System requirements

To operate the Midas Method you'll need access to Racing Post and Betfair and preferably a few bookmakers accounts. You do not need to be paying a subscription to the Racing Post for the information you will need. The before racing method recommends you apply it between 12.30 to 1pm (obviously earlier during winter due to earlier starting times).

#### Staking Plan and Betting Balance

There is no staking plan included in the Midas Method system although the Author does state he backs selections 2pts place and 1pt to win. Therefore I decided to use two separate betting banks of 100 points each.

#### Betting Bank 1

I bet 2pts place and 1pt win. The place part was at current Betfair price or if no liquidity Betfair SP. For the 1pt win part I used the best current price with either a bookmaker or with Betfair.

#### Betting Bank 2

I bet 1pt place and 1pt win using Betfair SP for both.

#### Results

After 84 Betting days the final figures does not look too good.

## BST Newsletter © BettingSystemTruths 2013

**Bank 1: Start Balance** £1000

**Final Review Balance** £0.00

**Bank 2: Start Balance:** £1000

**Running Balance:** £645.21

**Total Bets** 1328

**Total Place Bets** 664

**Total Win Bets** 664

**Win Bet Strike Rate** 23.49%

**Place Bet Strike Rate** 52.11%

So Bank 1 was completely wiped out and this was following the vendors recommended staking. Bank 2 fared slightly better but still ended up losing over a third of the betting bank. On top of that the win and place percentages were nowhere near the 59% for the win or 87% for the place as claimed. You also have to take into account the time taken to operate before purchasing any system or strategy, and I found this to take a lot longer than advertised. Granted you can now pay for just the tips and remove the issue of the work, but for a lot more cost long-term. The fact that the vendor has made these changes does not instill me with anymore confidence in the system, quite the opposite. As soon as I read the PDF system I was concerned this system would struggle to find value selections based on the criteria, but this of course is my opinion. In any case I have no alternative to put this firmly in the failed category.

Regards

# Current Reviews

[Return to Contents/Index](#)

This is a quick insight how each review is performing.

**Systems:** These are a set of rules that are used to make selection criteria. These rules are hard and fast without room for interpretation or discretion.

**Methods or Strategies:** These services are based upon loose rules or advices that are applied, with skill, by the user of the service.

**Tips:** You receive tips from the service provider of back or lay bets and you back the tips to the recommended stakes or to level stakes.

# League Table of Reviews

[Return](#) 

A reasonable way of comparing the performance of systems is to work out the profit (or loss) as a percentage of the starting bank. Obviously this table doesn't replace reading the reviews, because *profit as %age of bank* is not the only factor in judging a system. Nevertheless, it is a valid at-a-glance way of bringing the mass of data together.

The league table now includes systems that have finished their reviews as well.

We have thirty three reviews that have made a profit of over 15%. Please note we have pulled out Speed Ratings at the request of the vendor.

Reviewed System	Bank Start	Total /Loss Profit	Profit as Bank %age of	Position Week Last	Position Week This
