INTRODUCTION

Hi Folks,

We have one Final Review this week – Dave's Pro Golf, which failed, and one Introduction for Betfair Success Formula.

This week's league table shows that Champion Draws has powered to the top of the table after another good week's profit. This week I'm including a graph of the profit being made by the front runners as a percentage of their starting bank. This gives a week by week view of their progress since we started this form of the league table.

Our Review Manager, David, is working hard to bring the outstanding reviews up to date, Keep up the good work, David!

We'd like to hear from you, please contact me via the Bloggers Corner at rich@bettingsystemtruths.com

Betfair Success Formula – Introduction

Hi Bloggers

This is a football betting method from the author of Betfair-ATM and other sports betting strategies. It concentrates on European major league soccer matches and European cup matches. It is not for individual Country cup matches (such as the FA Cup).

The bets are placed before Kick Off with a major bet on the main Match Odds market and with an “insurance” bet on another market for the same match. You do need to watch the odds in-play, so that you can trade off your bets. The sales page says that with £100 bets and a starting bank of £1,000, you would have made over £1,000 profit in 34 days! So we’ll see how we do over a 56 day period and if it is successful we will see how it does over the extended 84 day period.

We’ll start with a £100 bank and bets of £10. Our target will be to make £100 profit. In other words, 100 point bank, with 10 point bets and a target of 100 points profit.

The Betfair Success Formula is a method or strategy for betting, rather than a strict system. Advice is given on the selection of matches, but nevertheless different users will possibly select different matches, due to when they are available to monitor the match or depending on personal choice of match. You are advised on the range of odds that a match should be offering and also to be selective and not have too many matches running at once. But due to the large number of matches being played on many days, it would be possible to run the formula in several matches over one day, especially at weekends. Perhaps a match at noon on a Saturday, then a couple of matches at 3pm and a couple of evening matches. So there is no shortage of potential matches to bet on and plenty of opportunities for those who have a regular 9 to 5 job.

Betting System Truths Weekly Newsletter © Enigma Media 2011

You do need to monitor the match and you are advised to trade out your bets at half time. The PDF manual does say that if you are experienced and knowledgeable about football, you could wait until the 70th minute to trade off, so that you make more profit. For the purpose of this review I will close outstanding bets at half time, to eliminate that element of judgment.

I recommend using <http://www.futbol24.com/Live/> if the match is not on TV. In my experience it notifies when goals are scored as quickly as any site that I've tried. Of course you would see when a goal is scored by watching the Betfair markets, but futbol24.com (and also betdevil.com) will also help you select your match to bet on. The manual recommends www.7m.cn for doing this, but I don't find that site as easy to use.

Personally I found the PDF manual hard to read. It is a huge (8MB) PDF with many screen shots. But the screen shots are not clear and actually it is hard to read the figures in the screen shots. Also scrolling down, reading the explanatory text and scrolling back up to look again at the screen being referred to, is hard work. The text explanation is in clumsy English and makes it harder to understand the strategy than it should be. The method is clever, but actually very simple, so take your time, study the PDF and get a thorough understanding before running the method – that's my advice.

Fairbot or Geekstoy are recommended to help with the trade-off calculation, personally I use BfExplorer for my other trading and this will also work fine to calculate your trade-off with this method. You can also do the trading in-play from the normal Betfair interface, but you will need to work out the trade-off bet yourself – it's easy to do once you have practiced it.

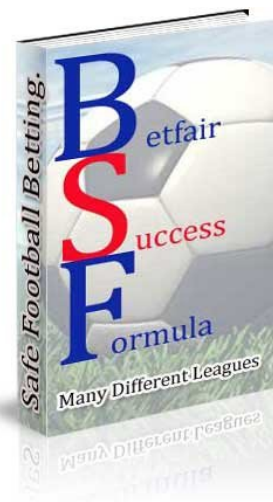

There is a training video that shows the betting in progress and that helps a lot to understand how the strategy works. The sales page describes it as a low-risk strategy, but it should be understood that it is the choice of matches that makes it "low-risk", the actual bets, being lays, carry a relatively high risk. If the match goes against your expectation you can be carrying a lay liability of 4 to 7 points for 1 point lays. So the trick is to try to pick matches where the actual game does not go against expectation. If the match goes against you, the advice is to wait until half-time to see if it sways back in your favour. I expect this will take some nerve. The author advises not to worry!

If you look at the sales page, you will see what I mean; out of 34 betting days there were 4 losing days carrying losses of between -55 and -100; compare these to the profits on winning days. So the success secret is to pick matches where these losing days are rare. Their strike rate of successful winning days was 30/34 or 88%. I'll compare that to the strike rate that I get.

Currently the Betfair Success Formula costs £69.95 and is due to go up to £87. This is a one-off payment with nothing further to pay. There is no reason to suppose that sales of the formula will adversely affect the odds, as there is very high liquidity in the markets that the formula uses.

Final Reviews

Daves Pro Golf Selections - Final Review - Reviewer Dave – Review Manager

Well, after trying Daves Pro Golf Selections for 8 weeks what is the outcome?

Hi Bloggers

Well after trying the service for 8 weeks what is the outcome well with an overall loss on all bets of 35.20 points it has to be failed. It is tricky with this kind of service as just one good winner and it would be in profit again, but one can only go on what has happened during the course of the 8 week review. Right on to some facts and figures well we covered 13 tournaments and so on to the results for the main each ways selections:

Main E.W Selections
Number of Bets 58
2 Winners
2 Second Places
2 Joint Second Places
3 Fourth Places
1 Fourth joint Places
3 Fifth Places
45 Outright Losers

Total Stakes 116 points
P/L minus 37.88 points

As you can see from above we only had 2 winners at 12/1 and 9/1, Daves Pro Golf Selections did have 2 players who got beaten in play offs so came pretty close to winning there. But at the end of the day there were not enough winners or alternatively bigger enough odds winners to make a profit.

Moving on to the lays which have increased in the last 3 weeks now as I mentioned in Week 7, Daves Pro Golf Selections claimed in an e-mail 9 winning Lays this was correct results wise but from a betting angle impossible as you could not get any odds for 8 of those lays even if you took those into consideration you still have an overall loss of 30.28 points. Another area of concern is when Daves Pro Golf Selections does quote a lay price in its e-mail it is the same as the Back odds and has no relevance to the Lay price; this was actually commented on by one of our regular blogger's Ian F. On to the breakdown for the lays:

Lay Selections
Number of Bets 25
17 Winning Lays
5 Losing Lays
3 Tied
Strike Rate 77.28%
P/L minus 3.70

Betting System Truths Weekly Newsletter © Enigma Media 2011

As you can see this showed a loss of 3.70 points now moving to the one area that made a profit during the trial and that is the back bets here is the breakdown for those.

Back Bets
Number of Bets 13
11 Winners
2 Losers
Strike Rate 84.62%
P/L 6.38 points
ROI 26.92%

Considering that the odds on the bets were short not a bad return but unfortunately there was not enough selections to cover the loss of the other two sections. The cost of Daves Pro Golf Selections is 47 pounds per month or if you take out an annual subscription it will cost you 470 pounds which is just under 40 pound a month, if you were to stake 10 pounds E.W on the main selections and 10 pounds on the Backs and Lays which are really an extra you would find yourself 352 pounds down add the 2 months subscription costs you would find yourself 446 pounds lighter so you really need a 50/1 winner to see a return for your money. As I said at the start it could be just around the corner this week or next, but on the other hand we could be saying that in 4 weeks time. So taking in the overall losses and the question marks on the lays I would have to deem Daves Pro Golf Selections as failed.

Regards,

Dave

League Table

The systems under review have different starting banks, different stakes and some systems have variable stakes. A reasonable way of comparing the performance of systems is to work out the profit (or loss) as a percentage of the starting bank and to average this out over the number of the days of the review.

Sports Bet Gold and Soccer Magic both made a loss this week, so they give way to Champion Draws, which powered on again this week. Champion Draws has made almost 200% profit and Sports Bet Gold has made over 130% profit. Betfair Success Formula shows a little bit of promise, entering the chart at #4, but it is very early days for this one. After its second week, Place 2 Profit has crashed to the bottom of the table.

Obviously this table doesn't replace reading the reviews, because *profit %age of bank per day* is not the only factor in judging a system. Nevertheless, I think it gives a valid comparison and an at-a-glance way of bringing the mass of data together.

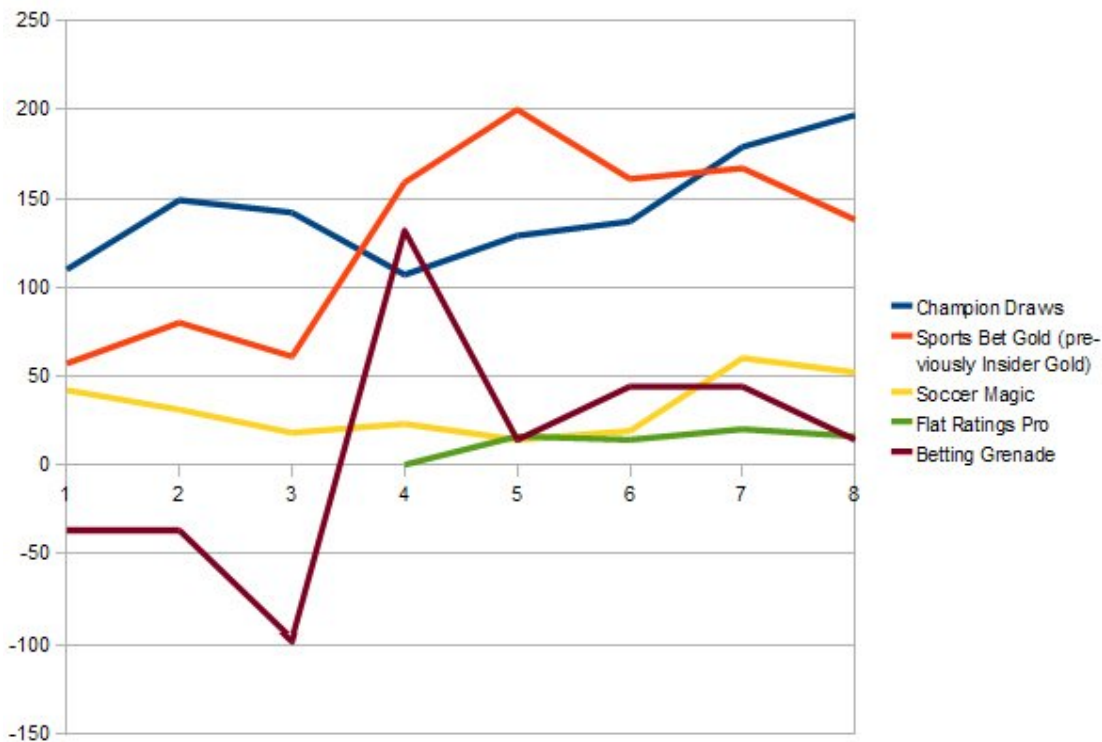

System Reviewed	Start Bank	Profit /Loss	Profit %age of Bank	Days Reviewed	%age per Day	Position Last Week	Position This Week

Profitability Graph

This week I'm including a graph of the profit being made by the front runners as a percentage of their starting bank. This gives a week by week comparative view of their progress since we started this form of the league table in newsletter #30.

It gives a representation of the volatility or dependability of each system. For example Betting Grenade has been a roller coaster ride, veering from loss to good profit and down to low profit. Whereas Champion Draws has shown an overall steadily increasing profit. Ideally we would want a graph that increased each week by roughly the same amount. If a system or tipping service could produce that, then we would really have a winning review!

Profit as a %age of starting bank

In the above graphs you can also see that over the last eight weeks Soccer Magic has not made much profit (its profit has increased by 10% in eight weeks). Similarly Flat Ratings Pro has not made any more profit in three weeks since its first good week. But on the plus side, they haven't made a loss for those periods either.

Next Week & Signing Off

This is Sgt Rich signing off and I hope that you have found some of the content within this newsletter to be useful. Remember to look out for the next BST newsletter in your e-mails on February 9th. Until then, here's to successful punting.
